Never underestimate the power of a simple
Modern therapy methods require modern instruments!

The implantology with immediate insertion after the tooth extraction is more and more a focus of interest in dentistry. It appears to be more than necessary to protect soft and hard tissue structures already during the extraction phase and to follow the principles of minimal invasiveness.

Here is an ideal complement for this: The Xodo Instruments!

Instruments

Design meets functionality.

The elegant, black finish (TI Version) is providing the instrument with a non-reflecting, extremely smooth and scratch-resistant surface.

All medical devices indicated here bear the CE mark according to the Medical Device Directive 93/42/EEC.

- Color coding for clear handling.
- Universal and complete extraction instruments in one tray.
- Direct and controlled power transmission to prevent tooth and root fractures.
- Ergonomic handle design (pencil-design) prevents unintended slipping during usage.
- Non-traumatic tooth extraction without injuring surrounding structures.

Separator, straight, 4.0 mm, for the luxation of separated roots, brown metallic.
Approximal Root Elevator, curved, 2.5 mm, # 77RS, mesial elevator, purple metallic.
Approximal Root Elevator, curved, 4.5 mm, # 77L, distal elevator, yellow metallic.
Approximal Root Elevator, curved, 4.5 mm, # 77RL, mesial elevator, yellow metallic.
Syndesmotome, curved, 4.0 mm, for distal access, purple metallic.
Syndesmotome, curved, 4.0 mm, for mesial access, purple metallic.
Syndesmotome, curved left, 4.0 mm, for lingual/buccal luxation, yellow metallic.
Syndesmotome, curved right, 4.0 mm, for lingual/buccal luxation, yellow metallic.
Syndesmotome, curved left, 4.0 mm, for apical access to the deep-lying root stump, brown metallic.
Syndesmotome, curved right, 4.0 mm, for lingual/buccal luxation, yellow metallic.
Apical Desmotome, mesial bending, 3.0 mm, for apical access to the deep-lying root stump, brown metallic.
Apical Elevator, mesial bending, 2.5 mm, for apical access to the deep-lying root stump, brown metallic.
Apical Elevator, mesial bending, 4.0 mm, for apical access to the deep-lying root stump, yellow metallic.
Apical Elevator, mesial bending, 4.0 mm, for apical access to the deep-lying root stump, brown metallic.
Apical Elevator, mesial bending, 2.5 mm, for apical access to the deep-lying root stump, brown metallic.
Separator, straight, 4.0 mm, for the luxation of separated roots, purple metallic.
Separator, straight, 4.0 mm, for the luxation of separated roots, yellow metallic.

ZEPP - Xod-1 Tray
DBGM acc. to Dr. Detlef Hildebrand
“Extraction in its most pleasant way”
The ZEPP Xod-1 Tray offers a universal instrument set for medical tooth extraction. The Xod instrumentation includes six different instruments:

Complete Set consisting of 17.007.01 - 17.007.05 and 41.855.01Z in the washtray

- X-Desmo-Tool (yellow) 17.007.05
  The X-Desmo-Tool easily enters into the periodontal gap with its pointed tip and initially loosens the Sharpey’s Fibres. The modified pencil handle and the handy shaft shape offer a depth sensibility like never experienced before without destroying related structures.

- X-Luxa-Tool-3 (blue) 17.007.03
  bent + narrow:
  for tooth loosening

- X-Luxa-Tool-1 (green) 17.007.01
  straight + narrow:
  A delicate and controlled power transmission guarantees a specific loosening and luxation of the tooth without any risk of crown or root fractures.
  Ideal position: approximal (mesial or distal) to the tooth which is to be extracted.

- X-Luxa-Tool-2 (green) 17.007.02
  straight + wide:
  Complete, non-traumatic luxation of upper molars (e.g. tooth 16). The ergonomic instrument shape ensures a gentle extraction without tooth fractures or any damage to the alveolar wall.

- X-Luxa-Tool-4 (blue) 17.007.04
  bent + wide:
  for tooth luxation

- Lucas Schaber ZEPP-Line 41.855.01Z
  Inspection and curettage of the empty dental alveolus. Complete removal of all inflamed and connective tissue fibres.
