## Children Forceps ROBA-Edition

Extraction Forceps modif. acc. to Dentist Beck, patented

These deciduous teeth extraction forceps have been designed to be as small as possible in order to avoid frightening younger patients with large, aggressive-looking instruments, thereby providing relaxed working conditions.

The patented Deciduous Teeth RoBa-Edition Forceps according to dentist Beck are the consequential advancement of conventional extracting forceps with the advantages of the tapered deep-grip extracting forceps. The modified beaks according to dentist Beck fit exactly onto the teeth which ensures a maximum grip during the appliance.

The wear-resistant Teflon® disc eliminates wear and tear in the joints and guarantees excellent smoothness.
