LANGER M5 Universal Currettes

in **ZEPF bionik** Handle

M5 Currettes are now also available as M5 Universal Currettes. The new Zepf Langer M5 Universal Currettes are especially qualified for Deep Scaling – to remove concretions on the tooth or root surface as well as inflamed tissue simultaneously in one step. As the working tips are sharpened on both sides, M5 Langer Universal Currettes are ideal for very deep pockets in closed periodontal treatments. The 1st shaft is about 3 mm longer and facilitates the access to deep gingival pockets (deeper than 5 mm). The shortened working tip allows a special subgingival curettage for tight and deep pockets and narrow root surfaces. The 0.95 mm thin, flexible and therefore tactile 1st shaft offers an optimal adaptation to deep roots.

M5 Universal Currettes are available in two different versions – Standard mirror-finished and **nanopal**® black-coated.

The black-coated ZEPF **ZEPF nanopal**® currettes have a durable, very hard surface which is very aggressive and sharp-edged due to its crystalline nanostructure.

Due to the unique coating, the surface hardness is increased to an unprecedented **4500 Vickers**. The cutting edge is thus highly tempered and does not need to be re-sharpened after each curettage. The black, scratch-resistant surface is easy to clean and prevents unpleasant light reflections.

As usual, the instrument tips are interchangeable due to the M4 x 0.5 mm thread. **QUICKFIX**®

24.201.05LM5

Langer # 5/6 M5, approx. 3 mm longer 1st shaft, Ø 0.95 mm, in **ZEPF bionik** handle yellow, inserts exchangeable, for anterior teeth

24.201.05LM5OX

Langer # 5/6 M5, with **ZEPF nanopal**® coating

24.208.03LM5

Langer # 3/4 M5, approx. 3 mm longer 1st shaft, Ø 0.95 mm, in **ZEPF bionik** handle yellow-green, inserts exchangeable, for upper molars and premolars

24.208.03LM5OX

Langer # 3/4 M5, with **ZEPF nanopal**® coating

24.210.01LM5

Langer # 1/2 M5, approx. 3 mm longer 1st shaft, Ø 0.95 mm, in **ZEPF bionik** handle black, inserts exchangeable, for lower molars and premolars

24.210.01LM5OX

Langer # 1/2 M5, with **ZEPF nanopal**® coating
