

Configuration Example

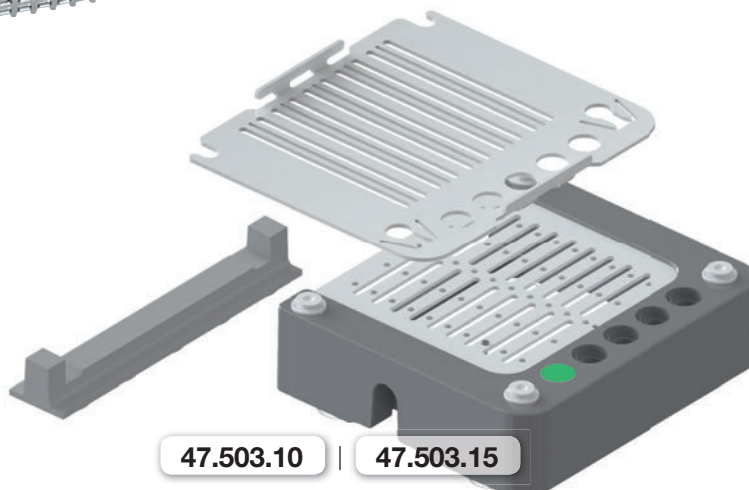

ZEPF CMF SYSTEM in a Washbasket

Following the Zepf-Care Series, the modularly composable components for the **ZEPF** CMF SYSTEM were developed, offering a washbasket with appropriate combination options.

The actual tools can be organized depending on the desired diameter, as illustrated in the CMF brochure.

This guarantees an RKI compliant reprocessing of the CMF SYSTEM.

47.503.10

47.503.15

Box for Screws
1.0 mm | 1.5 mm

85.251.04

Mixing Cup with lid,
stainless steel, Ø 4 cm
