

## Maintenance

### The Modular Hygiene System

**Flexible, efficient and approved safe.** The **ZEPF**-Care Universal Silicone Profile allows an easy placement of the instruments after a surgery. For sterilization and cleaning, the instruments are inserted in the profile according to their diameter and are immediately secured.

Additionally, we have equipped the **ZEPF**-Tray and Basket-System with silicone base. Therefore the tray guarantees an anti-slip position and the stacking stability is improved at the same time.

Suitable for standardized sterilization containers, it's available in four different sizes for an ideal working potential. Placesaving, secure and very practical and with a removable lid.

Profile, low

**ZEPF** *care*   
system

The **ZEPF** -Care-System increases your efficiency, as you can assemble your trays in a process-oriented way and work accordingly.  
You will meet the requirements of the RKI and the accident prevention regulation.  
It doesn't matter whether you are cleaning your instruments manually or automatically.

## Washtrays

**1/3** 178 x 90 x 24

**1/2** 178 x 135 x 24

**1/1** 275 x 178 x 24

**1/1** 275 x 178 x 24

## Advantages

- The meshes of the bottom and the lid are designed in a broad shape. Consequently dead zones are minimized.
- The diagonal profile of the mesh simplifies the identification of the parallel arranged instruments in the profile.
- The meshes on the edge of the tray are designed in a narrow shape and thus enhance the stability of the tray.
- The risk of injury is reduced.

Profile, high, universal

## Washbaskets

1/3 178 x 90 x 37

1/2 178 x 135 x 37

1/2 275 x 86 x 37

1/1 275 x 178 x 37

picture 1

Profile, high, universal  
(example see picture 1)

### Arranged in a practice-oriented way

As a result of the high and low configuration of the profile sections, the instruments can be placed in a space-saving way and can be removed easily.

It is possible to place two instruments above each other in one profile section. Contact of the instruments should be avoided in order to prevent contact corrosion.

### Tip:

The following instrument combinations are **possible** should they contact each other:

- plastic / plastic ✓
- plastic / metal ✓
- titanium / titanium ✓
- titanium / metal ✓

In case of contact, the following instrument combination is **not possible**:

- metal / metal ✗

The modular concept of the three different lengths can be tailored according to your request.

The 'universal profile' is compatible with the 'low profile' in order to ensure a secure hold of different instrument diameters and variations.

For special cases, we recommend the assembly of our press pad in the lid.

There are no limits set regarding design of your personalized tray.

## Aluminium Sterilization Container in 5 Sizes

Through the integrated filter in the lid and the base the Sterilization Containers are suitable for all steam sterilization methods:

- fractionized vacuum method
- fractionized steam method
- gravitation method
- pre-vacuum method

Different dimensions and stackability allow easy handling and optimal organization. The containers can be used for storing sterile goods and also for disposing contaminated instruments.

The newly developed latch system prevents accidental opening of the container and assures a simplified handling for the sterilization preparation.

The optimized sealing system assures a safe fixing of the filter.

### Accessories

## Universal Toolbox for the **ZEPF CMF** SYSTEM

The universal tool box is used for storing the tools for the sets CMS + ARCS. The tool box offers enough space for the following items:

- Screwdriver handle, big and small, each with dental connection, in the new optimized **ZEPF**-Design. They have a socket for exchangeable blades of all different diameters. The use of the handles is easy and intuitive while changing the blades.
- The blade holder allows an extra secure fixing of the screw heads on the blade insert.
- The pilot drills and the slide hole drill both have a graduation to allow a safe depth orientation.
- The inserting assistant is used for areas with tight space conditions.
- The Pin Applicator 47.950.02 which fits in the screwdriver handles completes the set for fastening foils and membranes.

**47.501.03**

CMF-Box for Screw Systems  
Ø 1.0 mm, Ø 1.2 mm and Ø 1.5 mm

**47.950.02**

Pin Applicator with dental connection

## Screw Rack for the Universal Toolbox

The Screw Racks are available in the following configurations:

- **85.540.60** Screw Rack Ø 1.0 / 1.2 mm each 4 rows + 2 rows Ø 1.5 mm to accommodate 5 screws
- **85.540.65** Screw Rack Ø 1.2 / 1.5 mm each 5 rows to accommodate 5 screws

The packing unit for the screws is 5 pieces.

An easy identification of the screws is guaranteed by using the length markers in the tray.

The colored pin with length marking is assigned to the respective screw diameter, thus allowing the determination of the screw length and a clear lot traceability in the box.

**85.540.65**

Screw Rack Ø 1.2 / 1.5 mm  
each 5 rows to accommodate 5 screws

**85.540.60**

Screw Rack Ø 1.0 / 1.2 mm each 4 rows +  
2 rows Ø 1.5 mm to accommodate 5 screws

## Washbasket for the ZEPF CMF SYSTEM

Following the Zepf-Care Series, the modularly composable components for the **ZEPF CMF SYSTEM** were developed, offering a washbasket with appropriate combination options.

The actual tools can be organized depending on the desired diameter.

This guarantees an RKI compliant reprocessing of the CMF SYSTEM.

**85.195.00**

Washbasket 1/1 as rack for the remaining components

## Accessories for the Washbasket

### Boxes

Dimensions 85 x 75 x 22 mm (L x W x H)

**47.503.53**

Screw and Pin Box for 2 x 5 screws Ø 1.2, 1 x 5 screws Ø 1.5, 10 membrane pins and a small storage space for instruments, membranes, bone plates etc.

**47.503.50**

Screw and Pin Box for 3 x 5 screws Ø 1.0, 10 membrane pins and a small storage space for instruments, membranes, bone plates etc.

**47.503.10**

Box for Screws Ø 1.0 mm

**47.503.20**

Box for receiving e.g. titanium plates
